of a number of prominent gentlemen residing in the different settlements of your Electoral District to offer myself as a candidate to represent your interests in the House of Commons. I have, after mature consideration, consented to do so, and have now the honor to solicit your suffrages at the approaching election.

Straits

Under the Terms of Union with the Dominica, it is the province of the local legislature, and not of the Bominion Parliament, to decide as to the kind of tariff that the people of British Columbia deem to be best suited to their varied industrial interest, during the next ten years. Should, however, the question come before the Bominion Parliament, I shall endeavor to have the tariff so framed as to meet with the concurrence of the agricultural, mining, and commercial interests of your district.

multions rapidly improved.

The question of the early construction of a Marine ospital at Nanalmo, I deem to be deserving of serious consideration.

The Geological Survey now begun will doubtless be of great practiced advantage to the country,—and anything that I may be able to do to insure the geological exploration of the vist mineral wealth of your district shall not assume my attention.

tion of the vist unineral wealth of your district shall not escape my attention.

The Fisheries along our coasts promise to become very profitable, and as the bominion Government has agreed to extend its protection and encouragement to that valuable and important branch of industry, I will endesvor to secure for your district its full share of any aid that may be appropriated not that purpose.

Authorized the third to explain my views at greater length, I will take an early opportunity to meet you personally and collectively in the different settlements, when I may bring under your notice other questions of a Provincial and Bominonal character.

In concassion, Gentlemen, if you should do me the honer to return me to the House of Commons as your representative, I pledge myself to fathfully serve your interests to the best or my ability.

I have the honor to be, tientlemen,

To the Electors of Vancouver GENTLE MEN 1-In response to the solici

clection.

The measures that a member of the House of Commons may be called on to deal with being different from those of a member of the local legislature, being in their nature more national, it is doubtiess expected that I as a candidate should advert to at least some of them that more directly concern your interests. I will say, then, that having been one of the earliest advocates of a Camadian Transcontinental Railway, I shall, if elected, consider it to be my paramotint duty in view of making it all be at Esquimait, and that the line shall traverse the entire outst-asstern Coast of the Island from Johnson Straits

district.

As the Dominion now possesses exclusively the right to manage our postal and telegraphic affairs, I shall endeavor to secure for the castern Coast a bi-weekly mail steamer of a appear chas to the one now plying on the coast,—and also better mail facilities in each settlement; and as I deem it to be of great importance commercially to have the most rapid means of transmitting intelligence between Nanaimo and Victoria, I shall urge on the Federal Government the importance of the early construction of a telegraph line to connect the two principal towns in the Province.

The increasing importance of the commerce of the

towns in the Province.

The increasing importance of the commerce of the Gulf of Georgia renders it necessary to have more Lighthouses. I shall therefore make the most strebuous exertions to induce the Federal Government to build a lighthouse at Namaino at oage, and to creet others elsewhere, as soon as possible, to insure greater saiety and certainty in havingating the Gulf.

With respect to the Indians, I will arge that they be settled on Reservations, under the superintendence of Government Agents, where they may, with the issistance of the Government, be laught line arts of civilization, and thus have their social, moral, and religious conditions rapidly improved.

CENTLEME. A 1— Having been requested by a number of electors to become a cannidate for the representation of this district. I have great pleasure in complying with this request, and beg to solicit jour votes and support. The Daily Standard. Saturday, October 28, 1871. The Ottawa Immigration Confer-

One marked difference between an old and a new country is that the former don't want immigration, and the latter does; the former want to get rid of their surplus population as cheaply as possible. and the latter are prepared to pay a fair price for it. Some new countries like the United States don't pay a cent directly to import immigrants, but simply show that there is plenty of work at a good price for all that may come. In the Australasian colonies much has been done to assist immigrants. Even the South African, and South American States have entered the manmarkets of Europe and bid for population. All these countries are benefitting more or less by assisted or unassisted l'amigration. The United Sta'es, however, has been the greatest attraction of all. No country has received, absorbed, and assimilated so many foreigners within the same period of time as it has. Its wonderful industrial resources, its free institutions, welcoming the oppressed of all nations to share them, and its proxmity to Europe, have contributed to make it the asylum par excellence for the surplus population of Europe. Ganada, however, though located side by side with the Great Republic, has never, either as seperate Provinces, nor since their consolidation into a Dominion, done much-certainly not as much as she night have done-to invite and retain inmigrants from the British Isles and continental Europe. What results will flow from the great Ottawa Immigration Conference, we can't decipher. What its recommendation was, we don't positively know. If we knew its recommendation, diction as to its success. The nearest that we can get to what it recommended. is that a sum be granted by Parliament for Immigration, and that it be divided between the respective Provinces constituting the Dominion. Opposition to such a subsidy may arise; but so far as this Province is concerted, it would be heartily welcomed. We have wheat-growing and beef-raising land sufficient to feed millions; but we want more money to even Lower Canada. The surplus revence of the Province, by the public works that it will construct, will retain and attract population. The public works that will be undertaken here by oc28 FINDLAY, DURHAM & BRODIE. the Federal Government, will give us another means to get population. But neither of these means satisfy our wishes. A large percentage of the population that may be thus drawn hither, will in all probability be semi-floating; and exlic works can be continued on a grand scale for a long series of years, Just Received Ex "Mountain Ash" we fear that the attraction of public works will operate very much like a mining excitement on a grand scale. As the excitement barometer falls, so the imof population in the contiguous States shall make it undesirable to cross the border. The only sure and certain mode of rapidly increasing our permanent population is to induce population to take possession of our soil as farmers. To get such an agricultural population, we will have to go abroad to got them; and to go abroad we want more money. The rumored immigration subsidy would be just the thing for us. At present any one who will visit New England railroad depots in harvest time will see hundreds of French Canadians. who have gone to the American side to secure temporary employment. Now why, with a little surplus cash, can we not induce Lower Canada to send us out a colony or so of habitants every year. We have the room; they have the new-country skill; and here is a better place than the American side to utilize it. Again, not only Ontario, but the Maritime Provinces grow men and women for the American side. Now why can't a portion of it be turned off into Manitoba and British Columbia, instead of it being swallowed up in the Mammoth Republic Sale or to Let. We may be mistaken; but, we believe that a judicious expenditure of money would turn the greatest part of the Pro-grants away from the United States to our own Great West. Any one familiar with Illinois, Iowa, Minnesota, Kansas, or Nebraska, will concede that everywhere the Eastern States' emigrant has contributed largely to their present population and greatness. So ought our Central British America and British Columbia be indebted to the Old Provinces of the Dominion. But more | AM DIRECTED BY THE HON. THE money than we have now—an additional subsidy from the Federal Government would enable us to enter the British Isles, and select-not pick up and ship atry. We want families; and we want them of the right sort. We want to import British homes, and plant them on our soil. We want the English, Irish and Scotch farmer, fresh from home, to take possession of our virgin soil, as well as pioneer immigrants from the Eastern Previnces. Then we shall lay a solid foundation for our future prosperity. Then we shall not be subject to an immigration of mere border-crossers; but our population will be our own, permanent and homogeneous: an immoved to ogeneous; an immovable base on which we can erect the institutions of our new nationality—the Dominion. We say, then, by all means, let the Federal Government appropriate money for immi seration to be divided among the Pro-
